December 4th, 2018 - Discoid lupus is a form of lupus that causes skin rashes and sores. It is a chronic autoimmune disease that can affect any part of the body. The symptoms of discoid lupus include red, scaly patches on the skin that can be painful and itchy. These patches can also cause hair loss and scarring. Discoid lupus is usually diagnosed through a combination of physical examination, blood tests, and skin biopsies. Treatment typically involves the use of corticosteroids and immunosuppressants to reduce inflammation and prevent further damage to the skin.
